Course Number GEO-202-01 **Course Description** Processes operating on and near the Earth's surface are responsible for the development of landforms, and the evolution of these landforms through time. This course covers erosional and depositional processes of glaciers, rivers, hillslopes, and wind, and the geochemical reactions responsible for the formation of soils and caves. These topics are covered within the context of the geologic evolution of the Mohawk Valley since the end of the last Ice Age Academic Term 21/SP Instructor Rodbell, Donald Location & Meeting Time Olin Building-307+ M/W/F 12:30PM-01:35PM LEC Petition Y Credits 1.00 Capacity 20 **Total Students** 21 Additional Information http://www.union.edu/Geology Common Curriculum WAC Writing Across Curriculum Interdisciplinary Programs **Environmental Science & Policy** Academic Department Geology Field Of Study Geology (GEO)
