```
Course Number
ATH-117-01
Course Description
This course seeks to introduce students to the world of stage lighting design and technology. Initial emphasis
will be on electrical theory, photometrics and the wide variety of fixtures and control boards in use in the modern
theater. The class will then progress to basic lighting theory and analysis of lighting techniques. In the final
weeks, the class will actively participate in the design, hang, focus and programming of the lighting for a
departmental production.
