```
Course Number
BIO-064-02
Course Description
Habitat degradation, global change and biodiversity loss threaten natural ecosystems. This course examines our
scientific understanding of ecology, genetics and evolution to investigate how these areas of study are applied to
develop management strategies to mitigate environmental threats. We will draw upon historical and modern
examples from the Albany Pine Bush, Adirondacks, National Parks and endangered species.
Academic Term
22/SP
Instructor
Rice, Steven
Credits
1.00
Capacity
22
Total Students
0
