

Course Number

BIO-354-01

Course Description

The study of the developing embryo is the science of the emergence of living order. With an emphasis on experimental design, we examine cell communication, cell fate, tissue patterning and morphogenesis, and gene expression and regulation explored within the context of model systems.

Academic Term

22/SP

Instructor

Theodosiou Napier, Nicole

Location & Meeting Time

Integrated Science & Engineering Complex-187+ M/W/F 09:15AM-10:20AM LEC

Credits

1.00

Capacity

22

Total Students

22

Additional Information
