Course Number PSC-176-01 **Course Description** In this course, we will assess democracy through multiple perspectives, most centrally through mathematics. In particular, we will ask ourselves essential questions such as: How can we measure and quantify democracy? How can quantitative methods enable us to analyze the concepts of fairness and bias, and also, what are their limitations? How can (and should) math play a vital role in upholding the essential democratic tenets of access, participation, and human rights? Throughout the course, we will use mathematical notation and terminology to represent real-world issues. Academic Term 22/FA Instructor Oxley, Zoe Gasparovic, Ellen Location & Meeting Time Bailey Hall-100+ M/W/F 01:50PM-02:55PM LEC Credits 1.00 Capacity 25 **Total Students** 24 Common Curriculum OMR **JDQR** Academic Department **Political Science**
