

Course Number

GEO-220-01

Course Description

Study of the diverse solid materials that make up most of our planet, many of our industrial resources and materials, and most of our precious gems. We will examine the nature of the external and internal symmetry of crystals, chemical bonding and substitution in crystal lattices, mineral properties, crystal optics, and the identification of minerals by physical, chemical, optical, and X-ray diffraction techniques.

Academic Term

20/WI

Instructor

Hollocher, Kurt

Location & Meeting Time

Olin Building-307+ T/TH 09:00AM-10:45AM LEC

Petition

Y

Credits

1.00

Capacity

15

Total Students

9
