Course Number
CSC-084-01
Course Description
Interactive fiction is storytelling that uses technology to create an interactive 'reading' experience, requiring the reader to make choices that influence the plot. In this course, students will read, critique, and create interactive fiction. You'll develop your storytelling skills, and along the way, you'll learn some programming concepts. This course is open to anyone who has taken a 100-level course in English. No previous CS experience is necessary. Students will access to a laptop for class.
