

Course Number

ENS-100-01

Course Description

An introduction to environmental studies from a scientific, policy, and engineering perspective. This course covers human-environment interactions, with a focus on the impacts of human activities on natural systems such as climate, air, water, and species diversity and the ensuing environmental injustice. The course discusses sustainable solutions for how we can build systems that will support billions of humans and the natural world. Fieldwork during lab periods involves the investigation of local environmental problems and solutions. This course is intended for first- and second-year Environmental Science and Environmental Policy majors, but it is open to all students.

Academic Term

22/SP

Instructor

Stahl, Mason

Location & Meeting Time

Olin Building-306+ M/W/F 09:15AM-10:20AM LEC

Credits

1.00

Capacity

26

Total Students

32

Common Curriculum

SCLB Science w/Lab

Interdisciplinary Programs

Science, Medicine & Tech in Cu

Environmental Science & Policy

Academic Department

Environmental Science & Policy

Field Of Study

Env Science, Policy & Engrng (ENS)
