

Course Number

PSY-310-01

Course Description

This course will present in depth the present understanding of the brain mechanisms that give rise to many mental processes, including attention, memory, language production, and comprehension, numerical processing, reasoning, emotions, and executive functioning. Weekly laboratory sessions will cover major methodologies used in cognitive neuroscience, including brain imaging and neural network simulation.

Academic Term

22/SP

Instructor

Romero, Stephen

Location & Meeting Time

Integrated Science & Engineering Complex-187+ M/W/F 10:30AM-11:35AM LEC

Credits

1.00

Capacity

24

Total Students

22
