

Course Number

GEO-117-01

Course Description

An introduction to the geologic processes causing floods, earthquakes, volcanoes, landslides, and other natural hazards and how hazards affect people and society. The course will include discussion of major events in the geologic and historical record as well as future hazard potential. We will assess the risks humans face in different regions, including local hazards, our contribution to geologic hazards, and how we can minimize and cope with future events. Course Types: SCLB,GNPS

Academic Term

22/SP

Instructor

Garver, John

Location & Meeting Time

Olin Building-307+ M/W/F 11:45AM-12:50PM LEC

Credits

1.00

Capacity

20

Total Students

21
