Course Number AST-240-01 **Course Description** A laboratory-based course in the observing methods and the astrophysics learned from astronomical studies at radio wavelengths. Topics include the operation of a radio telescope; important emission mechanisms; star formation regions; interstellar gas; interstellar molecular clouds; radio galaxies; and the cosmic microwave background. Student projects will involve observations with Union's 2-meter radio telescope and with the 37meter radio telescope at the Haystack Observatory in Westford, Massachusetts. Academic Term 22/FA Instructor Marr, Jonathan Location & Meeting Time Integrated Science & Engineering Complex-118 T/TH 10:55AM-12:40PM LEC Credits 1.00 Capacity 18 **Total Students** 10 Academic Department Physics and Astronomy Field Of Study Astronomy (AST)
