

Course Number

MER-212-01

Course Description

A basic engineering mechanics course concerned with the kinematics and kinetics of non-deformable particles and two dimensional bodies undergoing acceleratory motion. D'Alembert free body diagrams, Newtonian mechanics, energy approaches, vectors and the calculus are used to solve problems throughout the course. Topics include kinematics, force and acceleration, work and energy principles and impulse and momentum principles. Includes a design component.

Academic Term

21/SP

Instructor

Bucinell, Ronald

Location & Meeting Time

Synchronous Online-ONLI M/W/F 03:30PM-05:10PM LEC

Credits

1.00

Capacity

36

Total Students

30

Additional Information

http://cs.union.edu/me_dept/me_dept.html

Academic Department

Mechanical Engineering

Field Of Study

Mechanical Engineering (MER)
