Course Number MER-214-01 **Course Description** A branch of applied mechanics that deals with the behavior of solid bodies subjected to various types of loading. The solid bodies considered in this course include axially-loaded members, shafts in torsion, thin shells, beams, and structures that are assemblies of these components. Strength of materials analysis determines the stresses, strains, and displacements produced by the loads. Includes a laboratory component. Academic Term 21/SP Instructor Stehle, Yijing Location & Meeting Time College Park Hall-C102 M/W/F 01:50PM-02:55PM LEC College Park Hall-C104 M/W/F 01:50PM-02:55PM LEC Credits 1.00 Capacity 24 **Total Students** 19 Additional Information http://cs.union.edu/me_dept/me_dept.html **Common Curriculum** WAC Writing Across Curriculum Academic Department Mechanical Engineering Field Of Study Mechanical Engineering (MER)
