

Course Number

AST-051-01

Course Description

A descriptive review of current knowledge in astronomy, including methods of measurement and the applications of physics to astronomy. Topics include stars (structure, formation, and evolution), galaxies, and the universe. Evening laboratory sessions in which students learn how to use cameras and telescopes. No background in mathematics or physics required.

Academic Term

21/FA

Instructor

Koopmann, Rebecca

Location & Meeting Time

M/W/F 11:45AM-12:50PM LEC

By Permission of Instructor

Y

Credits

1.00

Capacity

38

Total Students

38

Common Curriculum

SET Science, Engineering Tech

Academic Department

Physics and Astronomy

Field Of Study

Astronomy (AST)
