

Course Number

GEO-112-01

Course Description

Basic geologic concepts are used for understanding how the environment and landscape affect society. This course examines the nature of various phenomena including earthquakes, volcanoes, landslides, floods, and coastal erosion. It also examines the interplay between human activities and the environment, such as soil and groundwater contamination, solid-waste disposal, resource development, the geologic record of global change, and the far-reaching consequences of global warming.

Academic Term

21/FA

Instructor

Smith, Jacqueline

Location & Meeting Time

Olin Building-306+ M/W/F 10:30AM-11:35AM LEC

Credits

1.00

Capacity

22

Total Students

20

Additional Information
